DETAILED ACTION

1. Claims 1-42 have been presented for examination.

Response to Amendments

2. The 112 2nd rejections are withdrawn in view of Applicants amendments to the claims.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: claims 1-42 are considered allowable since when reading the claims in light of the specification, none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims, specifically:

The recitation with respect to claims 1, 15, and 29 of the claimed computer implemented method/apparatus/computer program product, specifically the wavelet based matrix operator based on wavelet connection coefficients in combination with the utilization of the operator as representative of the time domain performance of the system as a whole and the combination of iteratively applying the operator within each clock period and sequentially over a subset of clock cycles. In addition the recitation of the number of clock cycles greater than 16,384 and the non-linear aspect defined as less than 50% of the linear portion of the mixed signal system. The Examiner notes that approximately less than 50% with respect to non-linearity is interpreted as less than 50% and approximately greater than 16,384 clock cycles is interpreted as greater than or equal to 16,384 clock cycles. See paragraph 94 of the specification.

The claims are rendered statutory since claim 1 recites a computer implemented method, claim 15 recites an apparatus with memory executable by a processor, and claim 29 recites a computer program product causing the processor to perform the claimed limitations. See paragraph 56 of the specification.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
